

Timber and Tile

A brand-new build, this home is a culmination of several imaginations. A modern aesthetic inspired the kitchen, framed with strong glue-laminated timber beams. The clients for this project were very hands-on, selecting the flooring, paint, and appliances themselves. A limestone tile wall is the focal point of the room, another element the homeowners conceptualized. The cabinetry, a collaboration between Bellingham Bay Builders and Smith and Vallee, accents the timber beams and flooring throughout the home.

"The most challenging part of this project was the wet and cold winter when this job was at a stage where maintaining the progress on the project was critical."

—Dave Brogan, Bellingham Bay Builders
