URBAN OASIS

*Jim Smith—
Haven Design Workshop*

“ Floor-to-ceiling glass walls give the illusion of a bamboo garden brought indoors. It’s actually a two-story atrium letting daylight flood the rooms while still providing privacy. To conserve floor space in this bedroom, the stairway leading to the loft has built-in Tansu-style cabinets. Our clients love the relaxed, outdoor feeling they get in their new home—a hidden oasis within the city.”
